Definition of Done

A user story can be marked as "done" when:

- All acceptance criteria have been demonstrably met.
- The application contains no runtime errors.
- The application contains no build errors.
- The code contains no type errors.
- Build and deployment tests have been successfully executed.
- The code is well-structured and neatly organized.
- The code includes comments to clarify certain sections where necessary.
- The code has been reviewed and approved by a team member.

Additionally for an API user story:

- The endpoint has been tested.
- The endpoint's response time is less than 2 seconds, unless otherwise specified in the user story.
- The code includes comments where necessary for clarification.
- New endpoints have been documented.

Additionally for a user story that includes something to do with frontend:

- The UI matches the provided wireframes.
- The UI has been tested.
