Definition of Ready

A user story can be marked as "ready" when:

- The user story is formulated using the following format:
  As ... I want ... so that ...
- The user story includes acceptance criteria, divided into the following categories:
  - Functional acceptance criteria
  - Non-functional acceptance criteria
- The user story has been prioritized.
- The user story has an estimated effort, based on the Fibonacci scale.
- The user story is assigned to a sprint.
- In GitHub projects, the user story has been moved to the "Ready" column.
- The user stories are written in correct and understandable English.
